### **DETAILED ACTION**

1. Please include the new Art Unit 2616 in the caption or heading of any written or facsimile communication submitted after this Office Action because the Examiner, who was assigned to Art Unit 2615, will be assigned to new Art Unit 2616. Your cooperation in this matter will assist in the timely processing of the submission and is appreciated by the Office.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Teichu (JP 09-153250) as set forth in the previous Office Action mailed out on 2/12/04 (Paper No. 5).

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/521,698 Page 3

Art Unit: 2616

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

- 5. Claims 2-4 and 6, are rejected under 35 U.S.C. 103(a) as being unpatentable over Teichu (JP 09-153250) in view of Yamamoto et al (5,740,435) as set forth in the previous Office Action mailed out on 2/12/04 (Paper No. 5).
- 6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Teichu (JP 09-153250) in view of Seki (5,809,206) as set forth in the previous Office Action mailed out on 2/12/04 (Paper No. 5).
- 7. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Teichu (JP 09-153250) in view of Inoue (JP 10134479) as set forth in the previous Office Action mailed out on 2/12/04 (Paper No. 5).

## Response to Arguments

8. Applicant's arguments filed 5/4/04 have been fully considered but they are not persuasive.

Regarding the Applicant's argument in that the cited reference of Teichu fails to disclose the claimed reproducing means including the feature of detecting a head block

Application/Control Number: 09/521,698

Art Unit: 2616

number and any subsequent block numbers stored in the nonvolatile memory corresponding to the desired data to be reproduced and wherein the desired data is reproduced from the disk recording medium at the detection of the block numbers, Examiner disagrees. It is noted that such a reproducing means as indicated above and argued by Applicant is disclosed in Teichu. Because, Teichu does disclose that the controller 34 controls both the reproduction head which is arranged to reproduce recorded data from the disk and the reading of the File Allocation Table information from the memory so as to start the reproduction operation. And consequently, the reproduction of the desired data from the recording disk medium is performed at the recognition of the entire cluster address of the desired data. It is further to be noted that a FAT would include both block number and address information for the purpose of accurately accessing the corresponding data. Applicant's attention is directed to the paragraph entitled "SOLUTION" of Teichu.

#### **Conclusion**

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 09/521,698

Art Unit: 2616

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 703-305-4780. The examiner can normally be reached on MM-F (9:00-6:30), second Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, Thai Tran can be reached on 703-305-4725. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

B. Chevalier July 24, 2004.
